

Hyper Dissolved Oxygen

Your pool or spa can make you healthier!

Breathing life into water

Hyper Dissolved Oxygen is a revolutionary technology! It creates **BILLIONS** of ultra-fine hyper dissolved oxygen bubbles and sends them into your pool or spa. The dissolved oxygen content in your water is increased, which *increases* the disinfection of your water and *improves* your health.

Ozone is one of the strongest natural oxidizers and disinfectants that exists. Ozone can be 20 to 3,000 times stronger than chlorine. Adding the medical-grade ozone to the HDO System will greatly **REDUCE** the need for traditional chemicals.

The Aqua Fuzion system has been in use for more than a decade on the West Coast. It has been continually subjected to research, development and testing by Pure Vision Technologies, whose mission is to provide the **HEALTHIEST** swimming environments possible.

Our HDO systems infuse your body with 2-4 times as much oxygen as does a hyperbaric chamber!

**Great for Families • Community Pools • Seniors • Therapy Water • Athletic Recovery
People with arthritis, breathing difficulties, skin issues • Competitive swimmers • Aquatic Staff**

COMMERCIAL / RESIDENTIAL PORTABLE HOT TUBS HOT AND COLD SOAKING TUBS

Reach Optimal Health

The incredible HDO nano bubble is small enough to easily absorb through the skin, leaving you refreshed and energized. You'll experience a reduction in inflammation and enjoy a feeling of rejuvenation.

AMAZING Water Clarity

Your water becomes crystal clear, looks inviting and healthy—and it is!

Increased Bather comfort

The water feels smooth and silky, your skin will feel fabulous—you won't feel like you need rinse chemicals off! Even those with the most sensitive skin will enjoy being in a hyper dissolved oxygen pool or spa.

Improved Pool/Spa Sanitation

An eco-friendly, efficient and safe solution to sanitize your pool/spa. The tiny bubbles are more effective at surrounding a contaminant and neutralizing it. The HDO oxygen bubbles stay in the water for weeks!

Improved Air Quality

Reducing the chlorine in the pool means greatly reducing the unhealthy chloramine gas that settles in the air above the water.

Measurable

The effect in the water is tangible and can be measured with a dissolved oxygen meter.
